

Weekly Meeting Log

For the Week of: July 19, 2019

No.	Completed Tasks	Task Owner	TTC	Next Weeks Tasks	Time Estimate	Next Cycle
1	Completed PHPUnit tests for is_valid function	Trevor	~6hrs	PHPUnit tests for remaining classes	15-20 hrs	Website design
2	Completed order class with testing	Trevor	~7hrs	Setting up remaining pages	15-20 hrs	Functionality and user testing
3	Audio file upload functionality working	Everton	~8hrs	Refactoring code	~20 hrs	
4	Store page functionality	Josh	~12hrs			
5						

Current Design to Date

The most accurate design of the website as of late is modelled off of our mock ups from our design document. The client has specified certain likes/dislikes for each mockup and we are basing our ideas off of that information.

Current Project Progress

This week we were able to make progress but it felt more like we took steps back as we realized we had to remake parts of our code in order to make testing more manageable and readable. As a result this week did not yield as many major accomplishments as last week but it got us closer to being on track, with that being said though there is no denying that since this is the case we are still very behind schedule. While these setbacks helped us find the flaws in our project right now it is not good enough to just fix them, we need to get the problems solved as fast as possible so we can get back on track.

Group Member Next Cycle Task Time Estimates

Tasks	Everton	Joshua	Trevor
Admin page functionality		~10 hrs	~20 hrs
Artist and Venue profile pages and sorting		~7 hrs	~15 hrs
Finish large file uploading	~10 hrs		~5 hrs
