## Current Design to Date

The most accurate design of the website as of late is modelled off of our mock ups from our design document. The client has specified certain likes/dislikes for each mockup and we are basing our ideas off of that information.

## Current Project Progress

The database is currently a little delayed, we had initially planned on having the database deployed to the server by June 14, but due to testing limited knowledge of the COSC 499 system we were forced to delay that deployment. We are still progressing well with our development phase and are currently on schedule to finish by our scheduled date.
